

Product Quality

DOPING AND IMPURITIES STATEMENT

SPONSER products stand for a high quality of ingredients, perfect digestability and palatability allowing for peak performances. This is reflected in the trust of numerous internationally renowned elite athletes. Sponser products are scientifically developed – in close cooperation with some of the leading universities of the world.

CERTIFIED RAW MATERIALS

Our raw materials are free of impurities. As an ISO FSSC 22000-certified Swiss food manufacturer, Sponser refrains from all activities involving hormonally active, prohormonal and pharmaceutically active substances in its production, storage and trading operations. We can therefore guarantee that neither our raw materials nor our finished products come into contact with any questionable substances at any time.

CERTIFIED PARTNERS

Sponser Sport Food only cooperates with audited industrial partners and suppliers who also have ISO or GFSI-recognized certification. These maximum quality standards for the food industry guarantee the impeccable quality of our products.

TRACEABILITY

All our raw materials are documented by quality agreements and are accompanied by an analysis certificate to allow end-to-end traceability.

CONTINUOUS MONITORING

SPONSER SPORT FOOD certifies that all food and their ingredients brought into circulation in Switzerland must be produced under Swiss food law. According to these regulations, food does not only have to be produced under faultless hygienic conditions but above all may not contain any substances which would be harmful to health in character or amount. In this respect Sponser Sport Food is under control by the official Swiss food law enforcement authorities.
